7 HiSMART THE AUTOMATIC SYSTEM FOR THE RECOGNITION OF ATHLETES

The HiSmart device is an integrated tag in the HiLink system designed for automatic recognition of athletes. HiSmart uses a Bluetooth protocol that allows the start, intermediate and finish HiLink to be sent the bib number of the athlete who will pass through that point. The device is supplied with a preset bib number that can be read in the top window and can be changed by HiLink (see HiSmart bib change menu) or by the ProUpdater program that can be downloaded from the Microgate website.

The HiLink system allows you to configure the distance at which HiSmart will be detected.

This setting allows determining at what distance HiLink will consider HiSmart devices to be in the area, and therefore the number in transmission. The possible settings are:

- 0= Disabled
- 1= Immediate Area; approximate receiving distance 20cm (used for example at the start in skiing)
- 2= Near Area; approximate receiving distance 3m
- 3= Far Area; approximate receiving distance 30m
- 2= Very Far Area; approximate receiving distance 60m

"SERVING THE NEEDS OF PROFESSIONALS SINCE 1978"

March 13, 2022

Hi Fred,

I hope all is well. We had a blast of a season with our new Microgate wireless timing equipment. It was a grand slam. Our timing crew went from being super stressed on race day to being super bored! We plan to buy 2 more systems for next year, depending on our finances.

BTW, copied is Jeff Foley, our new timing official, as Jim Woodruff just retired from the league (his son is a senior)

Cedric Bousquet

President – Chief of Race

(925) 984-7117 – cedric.ski.metro@gmail.com

February 28, 2022

Good morning Fred

We ran several events this year including a Class B state championships.

Except for a learning curve at the start of the season the microgate system was amazing

NO false starts...No missed starts

NO false finishes that were not weather related and NO missed finishes.

Very happy with the system. Virginia may have some timing building feedback but from the outside it was nearly flawless.

Please let me know your thoughts and thank you for your guidance

Cheers

Hawk
